PAYMENT PLANS

It is not necessary to pay the full amount for the doula services up front; once the deposit is made and the contract is signed, I'm your doula. The deposit is required to secure your estimated due date as I accept only a limited number of births each month. Your last payment is always due one to three weeks before your estimated due date (EDD).

Some families choose to pay a 50% deposit as the retainer and the other 50% at 37 weeks, while others choose to make four payments of 25% each. You are able to decide what works best for you and the payment agreement will be outlined in the contract.
